ACE QUIREI	25X1	SUPPLEMENT TO 25X' REPORT NO.
1.	oil field. Six old wells, nu	wells were drilled in the Yumen (97-13, 40-15) unbers 9, 11, 12, 15, 18, and No. 1 deep well, ed. The majority of these six wells were being
1.	oil field. Six old wells, no were repaired and reconditions operated 24 hours a day. Personnel employed at this fie technicians and drilling exper	umbers 9, 11, 12, 15, 18, and No. 1 deep well.
2.	oil field. Six old wells, no were repaired and reconditions operated 24 hours a day. Personnel employed at this fie technicians and drilling exper A machine factory at the field bits. The estimated total crude oil	umbers 9, 11, 12, 15, 18, and No. 1 deep well, ed. The majority of these six wells were being eld numbered over 4,000, including 20 Soviet ets. 2 The generator capacity was 10,000 kilowatts
2.	oil field. Six old wells, no were repaired and reconditions operated 24 hours a day. Personnel employed at this fie technicians and drilling exper A machine factory at the field bits. The estimated total crude oil highest monthly production dur 915,000 gallons was produced. From 10-22 November 1952, the Peiping, having been sent by s	unbers 9, 11, 12, 15, 18, and No. 1 deep well, ed. The majority of these six wells were being and numbered over 4,000, including 20 Soviet tts. ² The generator capacity was 10,000 kilowatts was attempting to make double-blade bits and room production for 1952 was 11,500,000 gallons. ³ The ring 1952 occurred in August when a total of following Soviet equipment was received in the following Soviet equipment was received in the same to Tientsin and thence to Peiping: 30 tanks.
3.	oil field. Six old wells, no were repaired and reconditions operated 24 hours a day. Personnel employed at this field technicians and drilling exper A machine factory at the field bits. The estimated total crude oil highest monthly production dur 915,000 gallons was produced. From 10-22 November 1952, the Peiping, having been sent by s67 rocket guns, 24 howitzers, guns. By 22 November, a small	mbers 9, 11, 12, 15, 18, and No. 1 deep well, ed. The majority of these six wells were being and numbered over 4,000, including 20 Soviet tts. ² The generator capacity was 10,000 kilowatts was attempting to make double-blade bits and room production for 1952 was 11,500,000 gallons. ³ The ring 1952 occurred in August when a total of following Soviet equipment was received in this part of this equipment had been shipped to the
